# BAYLINE

OLD WORLD CHARM,  
CUTTING EDGE DESIGN

Brasco introduced the Bayline Series to its product line in 2010. Specifically engineered to withstand high wind load capacities, the Bayline is ideal for storm-ridden and hurricane-prone locations. The unique B-fascia provides a concurrent gutter and wiring framework for seamless integration of a solar powered lighting package. The floating wall encourages additional airflow.

The Bayline is available with either a gable or barrel roof which is fully welded and pre-assembled prior to delivery. Standard elements include powder coat painted finish and aluminum or acrylic roof glazing. Choose optional roof and wall glazing infills to customize your design.

Brasco's engineering team calculates all shelters to meet local wind, snow & seismic load requirements.

**Below:** The Bayline's distinctive B-fascia offers an interesting architectural profile while providing a seamless conduit for wiring.

## Standard Specifications

### WIDTH

5'

### LENGTH

9', 13'

### COLUMNS

3.5" Round or Square Tube

### STANDARD ROOF GLAZING

Aluminum Sheet

Acrylic

Gable or Barrel Roof Only
