

SLIMLINE REVERSE GABLE

SIMPLE AND STURDY

The Slimline Reverse Gable is an adaptation of our Gable. Its spacious frame is particularly attractive with optional rooftop finials and any of Brasco's grillwork patterns.

Standard options include clear or bronze anodized finish, or choose custom wall and roof glazing to shape this design to match your brand colors. Select from an aluminum, acrylic, or structured polycarbonate glazed roof.

The Slimline series is versatile in size and can be tailored to fit nearly any specific dimension. For a narrow footprint, cantilevered roofs are ideally suited to limited pathways. Slimline Series shelters are easily configured for branding through color choices, graphics, and display options. Brasco's engineering team calculates all shelters to meet local wind, snow & seismic load requirements.

Below: Clear acrylic reverse gable roof with decorative finials, clear tempered safety glass with horizontal mullions, lower perforated aluminum infill, and wall mounted bench.
