

SUNLINE

CRISP EDGES, CLEAN COMFORT

The clean, crisp-edged Sunline is available in aluminum or steel construction with square columns and cantilevered roof. This shelter features perforated aluminum walls and a tamper-resistant solar powered lighting package, making it well-suited for high vandalism areas. The open roof permits additional air circulation.

Like most of Brasco's structures, the Sunline can easily provide additional revenue streams by converting one or both side walls to a solar-powered backlit 2-sided ad box.

Standard elements include powder coat painted finish and aluminum arch roof. Brasco's engineering team calculates all shelters to meet local wind, snow & seismic load requirements.

Below: Detail on ad box, header mounted batter box, blade rafter, and square columns.
