

TECHLINE

SMOOTH, SUBTLE IMPACT

The Techline features smoothly curved roof header corners with interconnected square aluminum columns and is only available with a barrel or gable roof.

Standard options include powder coat finish. Choose custom wall and roof glazing to customize this design. Select from an aluminum, acrylic, or structured polycarbonate glazed roof.

The Techline series is versatile in size and can be tailored to fit nearly any specific footprint. Cantilevered roofs are ideally suited to limited pathways while providing maximum shade and protection. Our shelters are easily customized for branding through color choices, graphics, and display options. Brasco's engineering team calculates all shelters to meet local wind, snow & seismic load requirements.

Below: Barrel roof, silver frame, and Beam bench.

Standard Specifications
