

# TRIDENT

HIGH END DESIGN,  
INDUSTRIAL EDGE

The Trident Series shelter is a sophisticated transit shelter with a modern profile. Its bold 4" square columns and exposed rafter roof system is a statement-making addition to any streetscape.

Like all of Brasco's shelters, the Trident is made of aluminum and will never rust. This shelter is ideal for long BRT or LRT canopies, and can be installed without side walls.

Standard elements include powder coat painted finish and 9/16" laminated glass suspended roof with stainless steel spider clamps. Choose from our selection of standard powder coat painted finishes or custom woodgrain options. Brasco's engineering team calculates all shelters to meet local wind, snow & seismic load requirements.

Below: Rear view.
